

# Fortitude®

Ultra-High Performance Hand Film

Stretch Film

## OVERVIEW

Fortitude® Hand Film, is an ultra-high performance stretch film engineered for exceptional pallet wrapping in demanding environments. Designed to deliver enhanced load containment and reliable performance at lighter gauges, Fortitude® combines advanced material science with sustainability—helping you secure challenging loads while reducing your environmental footprint.

## FEATURES

- Enhanced Load Containment: Strong holding force and great film stiffness keep even the toughest loads secure.
- Performance at Lighter Gauges: Achieves reliable wrap strength with approximately 20% less material than conventional hand films, resulting in a 20% reduction in CO<sub>2</sub> emissions.
- Reinforced Edges: Engineered to resist punctures and tears, especially at the edge of the pallet.
- Easy Handling: Rolls are designed for operator comfort and efficiency.
- One-sided cling: Reduces film abrasion during storage and transportation.

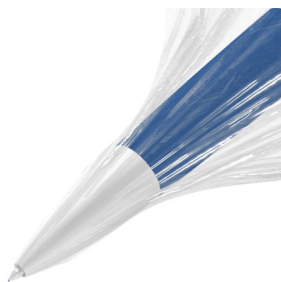

## APPLICATIONS

- Warehouse & Distribution Centers: Ideal for fast-paced, high-volume environments.
- Cold & Freezing Conditions: Performs reliably in low-temperature wrapping scenarios.
- Challenging Loads Suitable for securing a variety of load types, including extreme "C" loads.
