

Transcend™

Ultra-High Performance Machine Film

Stretch Film

OVERVIEW

Powered by advanced MAC™ Technology, Transcend™ delivers exceptional puncture and tear resistance—setting a new standard in pallet wrapping. Engineered for challenging loads, it ensures superior load containment and performance, making it the ultimate solution for high-demand scenarios.

FEATURES

- Sustainability Advantage - Uses approximately 20% less material than conventional machine films, reducing CO₂ emissions and lowering production and shipping costs.
- Engineered for Demanding Loads - Exceptionally resilient under harsh conditions and high-speed applications, with superior toughness and elasticity to handle the most challenging equipment environments.
- High Performance at Lower Gauges - Delivers unmatched containment and durability even at reduced thickness—helping optimize material usage without compromising strength.
- Operational Efficiency - Designed to minimize film breaks and downtime, outperforming commodity and many performance films in reliability and consistency.
- Enhanced Tear Resistance - Expected to exceed the tear performance of competitive films, ensuring secure wrapping for difficult loads.
- One-Sided Cling - Simplifies application and improves load stability during transit.

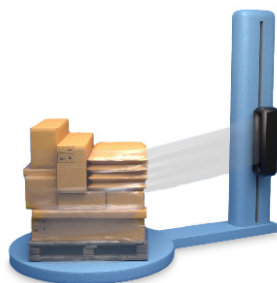

APPLICATIONS

- Performs reliably across cold storage, freezers, and environments with high, medium, or low humidity
- Ideal for A, B, and C load profiles, including unstable or heavy materials like stone, brick, and wood
- Compatible with a wide range of equipment: overhead straddle wrappers, turntables, and systems with 200%–300% pre-stretch capability

JDE Number	Product Code	Gauge (mil)	Micron	Width (in)	Length (ft)	Lbs per Roll	Rolls per Pallet
